# Carriere® Concept Symposium organized by Orthoplus

## A SINGLE GOAL :

Respect patients cosmetic objectives with a range of approaches for custom solutions.

Orthoplus is a long-standing Carriere® Motion distributor, supporting the company's development and thus the transformation your practices for the past 20 years. After revolutionizing clinical practice, Carriere® Motion has established itself as a vital patient management tool and an essential part of an effective, quick, stable and reproducible therapeutic strategy.

This new therapeutic approach is not only a dental solution but also factors in the facial axis and the profile to preserve overall patient integrity. Many have tried to copy Carriere® Motion, but it remains unmatched and is continually evolving, just like the practices of this symposium's participants.

Over the course of this day-long event, our speakers will explain the system's different uses cases and the therapeutic approaches compatible with Sagittal First, depending on participants' preferences.

There will be plenty of opportunities for discussion, drawing on your own experiences, doubts and questions. Our goal is to meet all your expectations, in a magnificent setting and friendly atmosphere.

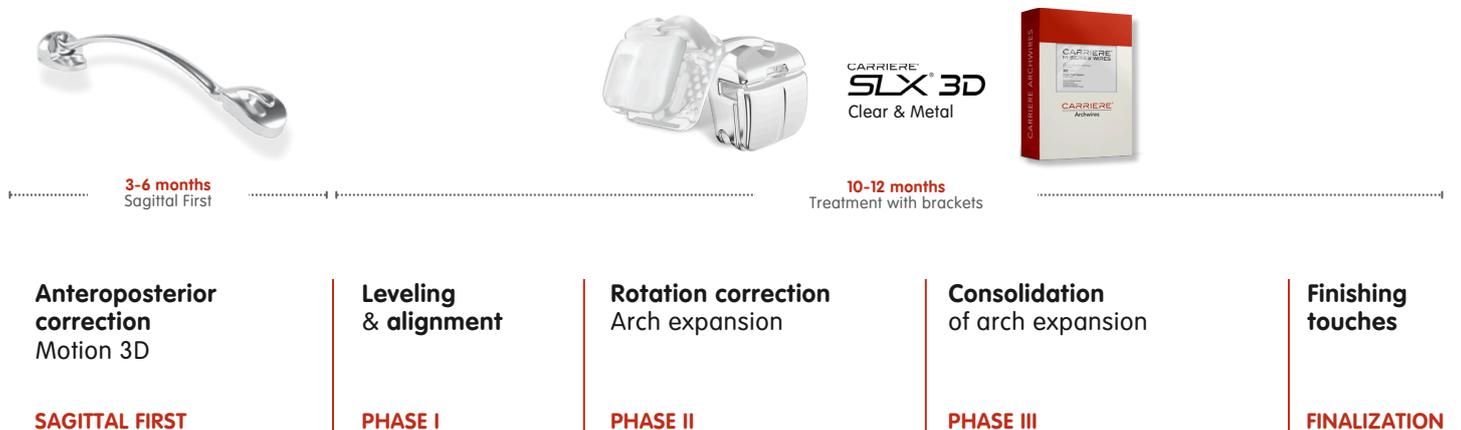

**MOTION 3D™**  
*L'original*

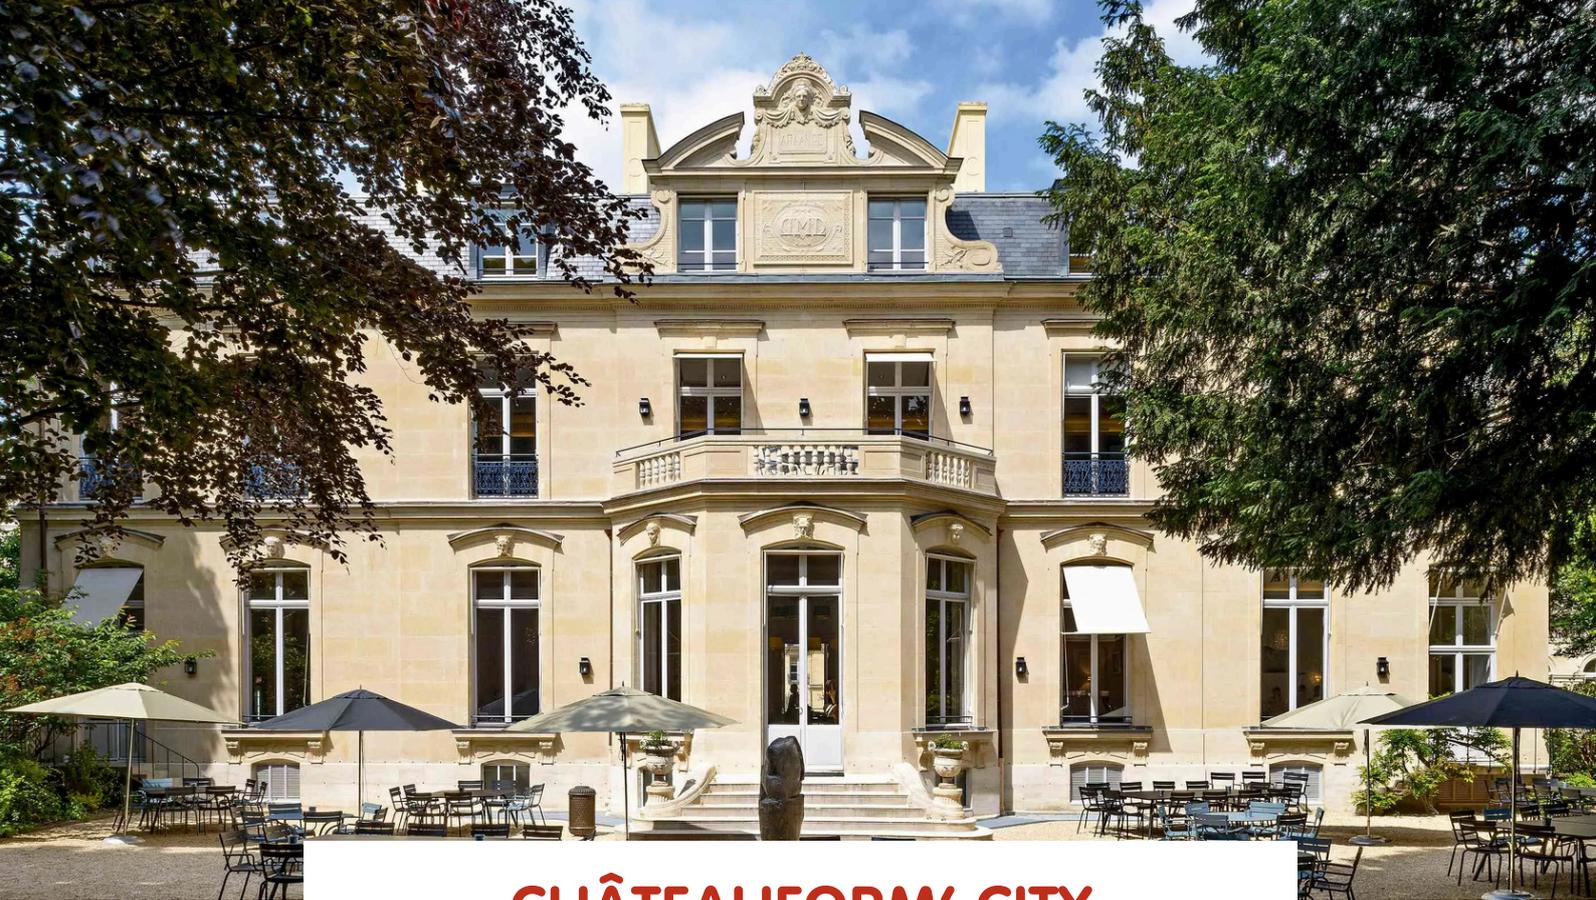

As orthodontic professionals, you work hard to achieve ideal clinical results every day, while also taking into account accessibility, comfort and your rapport with your patients, important factors that they really appreciate throughout their treatment journeys.

Learn more about Minimum Touch Orthodontics at the upcoming Carriere® Symposium.

# International Speakers

Dr Luis  
**CARRIERE**

## Designer of Carriere® Devices & Qualified Specialist in Orthodontics

With a degree in Dentistry, a Master of Science in Orthodontics and a doctorate in Orthodontics, Dr. Carriere is the inventor of the Carriere® self-ligating bracket system and the Carriere® Motion appliance. Aside from being a world-renowned conference speaker, he also manages a private practice at the Carriere® Orthodontic Center in Barcelona.

Dr Skander  
**ELLOUZE**

## Qualified Specialist in Orthodontics

Dr. Ellouze is a qualified specialist in orthodontics. He is fully dedicated to orthodontics, not only in the context of his office practice but also through training, research and international conferences. At his Tunis office, he specializes in the use of advanced technologies such as passive self-ligation, lingual orthodontics, intraoral scanning and 3D printing.

Dr Ronald  
**RISINGER**

## Qualified Specialist in Orthodontics

After graduating in dentistry in 1988, Dr. Risinger practiced in the US Air Force before specializing in orthodontics. A speaker and acclaimed author, he opened his practice in 1999 in Beaumont, Texas, and now co-directs four orthodontic practices. He is committed to education and is an assistant professor of orthodontics at the University of Texas.

Dr Ana-Maria  
**CANTOR**

## Qualified Specialist in Orthodontics

In addition to managing her private practice, Dr. Cantor is a member of the American Association of Orthodontists (AAO), the World Federation of Orthodontists (WFO), the European Orthodontic Society (EOS) and the Sociedad Española de Ortodoncia (SEDO).

8h45 Welcome and Coffee

8h45 - 9h Welcome Speech

## Talk

### Theme : Overview of the Carriere® concept

**9h - 10h30**  
**Dr Luis CARRIERE**

Thanks to all the information contained in the Motion appliance, we know that Sagittal First is a solution that offers long-term stability. This presentation will reveal some amazing Carriere® System innovations. It will give you better clinical results and improve patient comfort. You can also combine it with correction of the anterior sector, in particular with the very specific Infinity Loop tool. Dr. Luis Carriere will explain this new arsenal, illustrated with case studies, and give a technical presentation. You will also discover a new protocol to finalize treatment in 4 just appointments.

10h30 - 11h Break

## Talk

### Theme : Motion, Class II Booster and Mini-Screws – The Keys to Synergy

**11h - 12h30**  
**Dr Skander ELLOUZE**

In this talk, Dr. Skander Ellouze will draw on his extensive experience with Carriere® Motion to discuss the possibilities and limitations of this extremely effective tool, which plays an essential role in modern orthodontics. He will look at various clinical contexts to analyze the lack of vertical control offered by the Sagittal First approach in certain situations, and the need to consider skeletal and functional aspects to achieve a harmonious maxillofacial whole, reflected ultimately in a beautiful smile.

12h30 - 14h Lunch Break

## Talk

### Theme : Use of Self-Ligating Brackets in the Second Phase of Treatment

**14h - 15h30**  
**Dr Ronald RISINGER**

Passive self-ligating brackets are now recognized for their many advantages in treatment plans. In addition to involving light forces and increasing patient and treatment comfort, they are effective as a rapid, controlled and reproducible form of treatment. Dr. Risinger has fully mastered this therapeutic solution through his own practice. Here, he will present his constraint-free results achieved with simpler arching phases. This presentation will help you to reduce treatment duration, improve patient satisfaction and remove therapeutic constraints.

15h30 - 16h Break

## Talk

### Theme: Motion, Class III Treatment

**16h - 17h30**  
**Dr Ana-Maria CANTOR**

Motion is well known for its use in Class II treatment, but it is also a very useful Class III solution. It can be an option to avoid surgery in many Class III contexts and at the very least it can be used in the early stages to avoid worsening of Class III. Dr. Ana-Maria Cantor will present various cases and amazing results achieved with Motion Class III, with the aim of integrating it as a useful tool into treatment plans.

17h30 Closing Speech
